

*Together for a sustainable future –
acting responsibly, protecting the
environment and moving the world*

The topic of sustainability has gained enormous importance in recent years and has become a key issue for companies in all industries. As a transport company, we recognize our impact on the environment and the need to make our activities more sustainable and thus reduce our environmental impact. We are aware of our responsibility to make a positive contribution to shaping a sustainable future. For this reason, we are committed to developing a sustainability policy that guides our activities and decisions and supports us in achieving our goals for a sustainable future. This policy includes environmental, social and economic sustainability and is lived by all employees in our company. We are proud to do our part to promote a sustainable future.

Our fundamental beliefs and values are anchored in our company principles and are intended to serve as a model for our company. Environmental protection and a great sense of responsibility towards our environment are important to us. Therefore, the idea of environmental protection is reflected in all areas of Möbel-Transport AG. All employees take measures to ensure that the concept of sustainability is taken into account in all activities. Regular training of our employees guarantees the continuous implementation of environmental considerations.
